

# WERU DENNIS

**Junior Backend Developer | Full-Stack Developer**

Nairobi, Kenya

**LinkedIn:** [linkedin.com/in/weru-dennis-441329305/](https://www.linkedin.com/in/weru-dennis-441329305/)

**GitHub:** [github.com/Weruh](https://github.com/Weruh)

---

## PROFESSIONAL SUMMARY

Junior Backend Developer and Full-Stack Developer with hands-on experience developing web applications, backend services, REST APIs, database-driven systems, authentication features, and payment integrations. Professional experience includes contributing to the development and launch of Kujuana.com using Node.js, JavaScript, MongoDB, Paystack, and Supabase.

Experienced with Node.js, JavaScript, React, MongoDB, PostgreSQL, Supabase, Git/GitHub, and third-party API integrations. Completed a Software Development Bootcamp at Moringa School and currently expanding backend expertise in Python, Flask, Django, Django REST Framework, automated testing, Docker, and backend system design.

---

## TECHNICAL SKILLS

**Languages:** JavaScript, Python

**Frontend:** React, HTML, CSS, Tailwind CSS

**Backend:** Node.js, Express.js, REST APIs, Supabase, Flask

**Databases:** MongoDB, PostgreSQL

**APIs & Integrations:** REST APIs, Paystack, M-Pesa/Daraja API, Third-Party APIs

**Authentication:** Authentication, Authorization, Role-Based Access Control

**Testing:** Pytest, Debugging, Software Testing

**Tools:** Git, GitHub, Docker, Linux, VS Code

**Development Practices:** API Development, Database Design, Problem Solving, Agile/Scrum, Team Collaboration

**Currently Developing:** Django, Django REST Framework, CI/CD, Data Structures & Algorithms, Backend System Design

---

## PROFESSIONAL EXPERIENCE

### Junior Backend Developer

**Kujuapoint LLC** | Nov 2025 – Feb 2026

- Contributed to the development and launch of **Kujuana.com** using Node.js, JavaScript, and MongoDB.
  - Developed and maintained backend functionality for user accounts, authentication, profiles, and core application workflows.
  - Worked with MongoDB to support application data storage and backend functionality.
  - Integrated **Paystack** for payment and subscription-related functionality.
  - Investigated, debugged, and resolved backend issues during development and launch.
  - Collaborated with developers using Git and GitHub for source control and project development.
  - Contributed to the migration of backend and database functionality from Node.js/MongoDB to **Supabase**.
  - Worked with Supabase services to maintain backend and database functionality following the migration.
- 

## VOLUNTEER EXPERIENCE

### Lead Backend Developer

**KujuaRoom.com** | Volunteer

- Led backend development using **Supabase** to build and manage backend services.
  - Designed and maintained database structures supporting application functionality.
  - Developed backend functionality and supported frontend-backend integration.
  - Tested, debugged, and resolved backend issues during development.
  - Coordinated backend tasks and collaborated with team members to support project delivery.
-

# PROJECTS

## MyBiashara.shop — E-Commerce Marketplace

Live: <https://mybiashara.shop>

**Technologies:** React, Node.js, JavaScript, MongoDB, Supabase, Payment APIs

- Built and contributed to a marketplace platform connecting sellers and customers.
- Developed functionality for seller storefronts, product browsing, and e-commerce workflows.
- Worked with backend services, databases, and payment integrations.
- Implemented seller storefront functionality using individual subdomains.
- Worked on local payment workflows including M-Pesa integrations.

## Niwangu.com — Social Platform

Live: <https://niwangu.com>

**Technologies:** React, Supabase, PostgreSQL, Edge Functions, M-Pesa/Daraja API

- Developed a full-stack social platform using React and Supabase.
- Built backend functionality using Supabase Edge Functions.
- Worked with PostgreSQL for application data and backend functionality.
- Implemented backend logic for user interactions and application workflows.
- Developed M-Pesa Daraja STK Push functionality for subscription payments.
- Worked with authentication and database-driven application features.

## Tajiluxuryevents.com — Event Booking Platform

Live: <https://tajiluxuryevents.com>

**Technologies:** React, JavaScript, APIs

- Developed a web platform supporting event services and booking workflows.
- Built responsive user interfaces and integrated application functionality.
- Worked with backend and database-driven features supporting the platform.

## joelkariuki.com — Coaching Platform

Live: <https://joelkariuki.com>

**Technologies:** React, JavaScript, Web APIs

- Developed a professional coaching-focused website and digital platform.

- Built responsive frontend components and user-focused interfaces.
  - Integrated application functionality supporting the platform's business requirements.
- 

## EDUCATION

### Software Development Bootcamp

#### Moringa School

Relevant training:

- Full-Stack Web Development
  - JavaScript
  - React
  - Backend Development
  - Databases
  - Git & GitHub
  - Object-Oriented Programming
  - Software Development Fundamentals
- 

## ADDITIONAL DEVELOPMENT

Currently strengthening backend engineering skills through practical projects and structured learning in:

**Python → Flask → Django/DRF → REST APIs → PostgreSQL → Testing → Docker → Backend System Design**

---

## PROFESSIONAL STRENGTHS

- Backend and API development
- Full-stack web development
- Database design and management
- Authentication and authorization
- Payment and third-party API integration
- Debugging and troubleshooting
- Git/GitHub collaboration

- Problem solving
- Team coordination
- Agile/Scrum collaboration
- Continuous learning
