PROFESSIONAL SUMMARY

Full Stack Software Engineer specializing in building scalable SaaS platforms using the MERN and PERN stacks. Experienced in designing secure backend architectures, implementing payment systems, and developing real-time applications. Strong background in JavaScript ecosystems, PostgreSQL database design, and modern frontend frameworks. Combines engineering expertise with commercial experience in sales, enabling the development of technically sound and business-aligned digital products.

TECHNICAL SKILLS

- Programming Languages: JavaScript (ES6+), TypeScript, SQL (PostgreSQL), HTML5, CSS3
- Frontend Development: React.js, Next.js, Tailwind CSS, Redux, Responsive UI Architecture
- Backend Development: Node.js, Express.js, RESTful API Design, Authentication Systems (JWT, OAuth)
- Databases & Data Systems: PostgreSQL, MongoDB, Prisma ORM, Supabase (Row Level Security)
- Real-Time & Payment Systems: WebSockets (Socket.io), Supabase Realtime, Paystack API Integration
- Tools & DevOps: Git, GitHub, CI/CD Pipelines, Postman, Vercel, Render, Agile Development

PROFESSIONAL EXPERIENCE

Freelance Full Stack Engineer — Nairobi, Kenya (January 2024 – Present)

- Designed and deployed multiple full-stack SaaS applications from concept to production using modern JavaScript frameworks.
- Architected secure backend systems with PostgreSQL Row Level Security (RLS) improving application data protection.
- Integrated Paystack payment infrastructure supporting automated subscription billing and payment verification.
- Optimized frontend performance and SEO structure improving Lighthouse performance scores by about 35%.
- Reduced development cycle time by roughly 20% using AI-assisted workflows and modern debugging tools.
- Managed production deployments through CI/CD pipelines ensuring high reliability.

Sales Representative — Nairobi, Kenya (January 2023 – August 2024)

- Surpassed quarterly sales performance targets by 15% through negotiation and relationship management.
- Translated customer needs into structured insights that informed product development decisions.
- Strengthened stakeholder communication and requirement analysis skills.

KEY TECHNICAL PROJECTS

Niwangu — Subscription-Based Dating Platform

- Built using Next.js, Node.js, PostgreSQL, Paystack API, and Tailwind CSS.
- Developed secure subscription billing with automated webhook verification.
- Implemented PostgreSQL Row Level Security policies ensuring strict user data isolation.
- Reduced initial page load time by approximately 1.5 seconds through performance optimization.

Kujuana — Real-Time Social Engagement Platform

- Developed real-time messaging infrastructure using WebSockets.
- Created SQL-based matching algorithms using geolocation and user preference data.
- Managed CI/CD deployment pipelines ensuring reliable updates.

KeithMuoki — Coaching CMS Platform

- Built using the MERN stack (MongoDB, Express, React, Node.js).

- Developed a custom CMS for blog publishing and event management.
- Created RESTful APIs linking the admin dashboard with the public-facing site.

EDUCATION

- Full Stack Web Development (Self-Directed Intensive Training) — FreeCodeCamp and official technical documentation; 1,000+ hours of coding practice.
- Kenya Certificate of Secondary Education (KCSE)
